

Mark Knott is an Addiction Counselor at Gateway Regional Medical Center in Granite. Mark will give us an overview of addiction as a disease, how families and friends can help those seeking recovery, and what is involved with recovering from addiction.

Most of us know someone who is addicted. Perhaps we know someone who has died from overdosing. How can we help? Awareness and education is what we, as friends and family members, can do.

Here is our chance to learn more. Everyone is welcome to attend. No registration or fee is required, just come.

Mark will be available after worship to answer questions people may have.
